

API Observability & Anomaly Dashboard

Monitoring API Latency, Error Rates, and Payload Drift using Agentic ML.

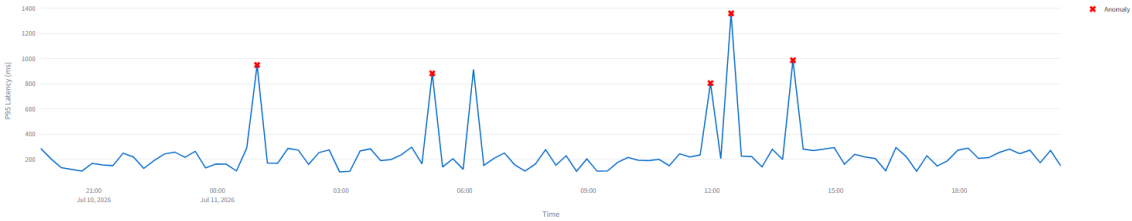

Live API Metrics (Last 24 Hours)

Total Requests316,949

Anomalies Detected5

Avg P95 Latency249.11 ms

P95 Latency & Anomaly Detection (Isolation Forest)

Payload Statistical Drift (Evidently AI)

Monitoring nested field: user.account_balance

Population Stability Index (PSI)

15.1342

 Drift Detected!

 **High Data Drift Detected!** The distribution of user.account_balance has changed significantly compared to yesterday. This could indicate a change in client behavior or a backend bug.
